

Relay

[yjuceDvNObb5q10.png](#)

The **iTriangle-Relay module** is a digital normally-open switch. This module allows you to control high voltage circuits with low voltage, for example, 5 volts on the controller. It has an indicator LED on board, that lights up when the controlled terminals are closed.

Specifications

| Parameter | V1.2 |
|-----------------------|------------------|
| Operating Voltage | 3.3~5 V |
| Operating Current | 100 mA |
| Relay Life | 100,000 Cycles |
| Max Switching Voltage | 250 V AC/30 V DC |
| Max Switching Current | 5 A |
